BOND PAPERS K

WRITING, PRINTING, COPYING

All papers below are acid free. Permalife® permanent papers are also Lignin-Free & Buffered (pH 8.5) and rated

to last 300 years when stored properly. They are tech-ready, suitable for drawing and for photocopying acidic papers. MicroChamber® Premium papers have activated carbons and specially formulated SPZ zeolite with alkaline buffers. Acids removed by MicroChamber® papers include ethanoic (acetic) and methanoic (formic) acid, phenols, aldehydes, hydrogen peroxide, ozone, sulfur dioxide, hydrogen sulfide, carbon disulfide, oxides of nitrogen, ammonia and formaldehyde.

ITEM	DESCRIPTION	PACK	PRICE
10012	8 1/2" x 11", 20-lb, Laser/Inkjet Permalife®, 25% cotton ivory white bond. Meets standards for Dissertation Paper.	25	\$3.49
10015		500	\$31.99
10212	8 1/2" x 11", heavy 24-lb permanent 25% cotton light cream fine bond. Cream color matches paper envelopes. Acid-free, lignin-free. pH neutral.	25	\$4.09
10215		500	\$37.49

WRAPPING TISSUE K

Use wrapping tissue over items in long term storage. Buffered tissue is helpful to enclose acidic papers (e.g. newspapers), and cottons/linens. Use unbuffered for other materials, such as leather, silk. Our current supplier's tissues, both unbuffered and buffered, pass the P.A.T. enclosure test for photographic activity. Tissue is folded for ease of shipping but can be rolled at your instruction.

BUFFERED

Use for news clippings, linens, papers. Has a pH of 8.5

SIZE	ITEM	PACK OF 5	ITEM	PACK OF 20
15" x 20"	75102	\$3.59	75122	\$13.89

Archival Boxes

Archival boxes - the first line of defense against a polluted environment. Use boxes to rescue quickly your valued records. After organizing, use them for long term storage. Gray/white boxes have black metal stays with board that is gray on the outside, white on the inside. Boxes are suitable for time capsule use. All pass the P.A.T.

CLAMSHELL STYLE BOXES K

One piece boxes have full lids and completely enclose books, documents, sheet music, letters, enclosed photos.

ITEM	COLOR	SIZE	PRICE
81-10490	Gray/White	3 3/4" x 3 3/4" x 1 5/8"	\$4.95
81-11470	Gray/White	6 3/4" x 3 1/2" x 4 3/4"	\$7.97
81-10420	Gray/White	12 1/4" x 9" x 3"	\$12.79

HANDY & SECURE BOXES K

Handy "SHOE" style boxes have short lids for easy access. "SECURE" style boxes have full lids that fit down over the bottom.

80-12085	Beige	12 1/8" x 8 1/8" x 5 1/8" tall, 1 1/2" lid	\$15.99
80-11770	Beige	12" x 6 1/8" x 9 1/8" tall & 1 1/2" lid	\$17.59
81-11780	Gray/White	12" x 8 3/4" x 11 1/4" tall, 1 1/2" lid	\$17.59

Gray-White Board - Meets the specifications of NARA. Sulfur free with a minimum pH of 8.5 and 3% calcium carbonate buffer throughout. Both gray outer and white inner are lignin-free & conform to the ISO 14523 Standard. TAPPI accelerated aging tests show the board prevents acid migration for at least 200 years. Sheets are 60 pt caliper with basis weight of 200 lb. per thousand square feet and Mullen bursting strength of 240 lb. psi.

Beige Board - A fully bleached fiberboard which is lignin and sulfur free and conforms to ISO Standard 14523. This material has a minimum pH of 8.5 and a 3% calcium carbonate buffer. The sheets caliper 60 points and have a basis weight of 225 lb. per thousand square feet with a Mullen bursting strength of 275 lb. per square inch. Board color is beige throughout.

NOTE: Additional shipping fees may apply for boxes.

NEWSPAPER PROTECTION K

Newspaper issues or pages usually need conservation treatment in order to preserve them as intrinsic artifacts, or for research or exhibit purposes. When in doubt, consult a professional paper conservator, since any treatment process can entail risk to both the material and you.

To best stabilize acidic papers like newsprint, de-acidify them and deposit an alkaline buffer and environment. Use a good de-acidifier spray such as **PaperSaver**. In order to provide support for a fragile sheet and permit safer handling, a de-acidified newspaper page can be encapsulated and then stored. While it is generally preferable to avoid encapsulating acidic newspapers that have not been neutralized, you can add support to them by adding a sturdy alkaline-buffered sheet behind the newspaper whenever possible. We suggest the 1-ply AlphaRag™ because its superior protection in a closed package includes **Micro-Chamber Protection** (see page 1 for more information about the paper). Currently, we have **Newspaper File Kits** for the 14"x24" zip-lock pouches (see below), and **AlphaRag® Inserts** in various sizes, too (see below). For better clarity, use a polypropylene enclosure with one of these backings (see page 5).

2-Piece Newspaper File Kit. Includes one 4-mil polyethylene pouch and one heavy sheet of AlphaRag® Conservation Paper.

11364. 14" x 24" **\$10.97**

3-Piece Newspaper File Kit. Includes one 4-mil poly pouch & 2 sheets of AlphaRag®.

11366. 14" x 24" **\$17.97**

Preserving Newspaper Leaflet. Eight concise pages of information about newspapers and how to store them. **FREE** with Newspaper Kit purchase

40880. Each **\$0.97**

ALPHARAG® INSERTS

Very popular as newspaper package inserts, this 1-ply heavy paper uses MicroChamber® technology. Archival, buffered, each. See p. 5 for archival plastic poly pouches.

10-8511. 8 1/2" x 11 1/2" \$4.97 (fits 36-20912)

10-1114. 11 1/2" x 14 1/2" \$6.97 (fits 38-1216T)

10-1217. 12 3/4" x 17 1/2" \$7.29 (fits 36-41318)

10-1316. 13 1/8" x 16 3/4" \$7.49 (fits 38-1419)

10-1319. 13 1/8" x 19" \$8.49 (fits 38-1422)

10-1323. 13 1/8" x 23 1/2" \$8.97 (fits 38-1424)

PH TESTING PEN K

Easy to use yet effective, this pen tests the acid content of papers used for writing, printing, copying, or as enclosures. Instructions included are easy to follow, and you can tell the amount of acidity by the color of stroke made.

ITEM	DESCRIPTION	EACH
64000	pH Testing Pen with instructions	\$7.59

CORROSION INTERCEPT BAGS K

Corrosion Intercept[®] reacts with and neutralizes all corrosive gases. It protects all metals, and it prevents galvanic corrosion. It provides the best protection against tarnish and corrosion-causing gases. It's clean, non-abrasive, and leaves no detectable deposit on the product. It will not harm gemstones, and it works independent of temperature and humidity. Provides effective tarnish & corrosion prevention for silver, gold, copper, bronze, tin, brass, magnesium, and ferrous metals (iron and steel). Tests have shown that it protects a variety of items such as books, stamps, paper, artifacts, CD and DVD media, cell phones and electronics, copper and bronze sculptures, and coins. When the color changes from brown to gray or black, it needs to be replaced. Estimated protection longevity is 30 years.
